## PROJECT EXPERIENCE

### BLUETOOTH CONTROL WIRELESS NOTICE BOARD - IOT

Successfully designed and implemented a smart wireless notice board system using Bluetooth technology and IoT principles. The system allows real-time message updates from an Android application to an LCD display through Bluetooth communication with a microcontroller. Played a key role in hardware integration, mobile app interfacing, and developing efficient communication protocols. This project demonstrated strong skills in embedded systems, circuit design, and IoT connectivity, while also enhancing user experience through remote, paperless communication.

**Key Technologies :** Arduino, Bluetooth Module (HC-05), Android App, MAX7219 DOT MATRIX, Embedded C, Serial Communication
